Narrative Description of Indicator

Data for this indicator were collected through the distribution of parent surveys, compiled and aggregated by an MSDE contractor, and analyzed by MSDE staff to develop State and local program improvement activities.

During the month of September 2013, 8,862 surveys were directly mailed to local jurisdictions for hand delivery to all families with active eligible children on 6/30/13. For families who indicated that Spanish was their primary language, the survey was sent out in Spanish.

With input from local jurisdictions, the one-page survey instrument was hand delivered to families. The completed surveys were returned to the MSDE contractor, via business reply mail. Compared to FFY 2011, the response rate for FFY 2012 remained high, from 46.7% for FFY 2011 to 45.0% for FFY 2012 (3,989/8,862)

From FFY 2011 to FFY 2012, results remained around 95%. Indicator 4A remained at 94.9%; Indicator 4B increased from 94.7% to 94.8%; and Indicator 4C changed from 95.2% to 95.1%. Overall, the results indicate a high level of performance and the State targets were exceeded again in FFY 2012.

In FFY 2012, two questions were included for families of 3-year-old children receiving services through the Extended IFSP Option. The results from these questions indicated very positive outcomes regarding families' understanding of their options at age 3, as well as families' ability to implement school readiness strategies with their children.

For example, 94.8% of families agreed with the statement: Over the past year, early intervention services have helped me and/or my family understand my options in order to make the best choice for my child and family to continue services through an extended Individualized Family Service Plan or move to services through an Individualized Education Program. And, 93.0% of families agreed with the statement: Over the past year, early intervention services have helped me and/or my family support my child to be ready for school by assisting me to teach my child pre-reading activities (such as naming pictures) and pre-math activities (such as sorting household items).

In addition, if the jurisdiction was below the state target on Indicator 4a, 4b, or 4c the jurisdiction was required to complete an improvement plan that included a discussion of the data and **specific steps to increase the benefit of early intervention services for the family.**

- 4A - Know their rights
- 4B - Effectively communicate their children's needs
- 4C - Help their children develop and learn
